Extremely helpful, very well organized, I like the anonymous question format

Inperson sessions were more beneficial than the virtual, was able to focus more

This would actually be a great lecture to have earlier in the year for interns

Probably the best teacher in all of board review. Thank you so much!!!!

Well balanced between questions and explanations

Great! 4 hours packed in one

Enjoyed these talks on high yield topics

Appreciate that time is efficient, question explanations are explained rather than copying and pasting the explanation

I like this format of us reading the questions and having autonomy to answer in our own thoughts!

High yield pulm + icu

Please do more ICU lectures!!

Excellent

I like how the questions have portions in red that show important clues. The slides are easy to follow and have great takeaways.

Liked the many questions. Wished there was more time to digest the content slides though

Loved it. Crit care session was really fun hoping for more of those we liked it. Dr Broderick always hits home runs on board review love them every time. Hope he leads more sessions in future. 10/10. Liked the interaction as well.

I really liked that the slides were simple and succinct despite the topics being quite complicated. I also enjoyed that we would have a mix of questions we've seen and haven't seen because it allows me to evaluate if I have learned from my prior mistakes when answering questions and applying it to new ones.

I like all the ICU questions!

May need to extend talk to provide more time to digest questions given the amount of discussion.

Interactive talk which helps. Maybe can ask for audience explanations, but that might make time to finish difficult

One of the best board review weeks we have had this year! Clear and easy to digest slides with a great mix of questions and content.
