Truly an outstanding attending to work with and such a pleasure. He taught us so much in so little time and he brought a supportive atmosphere for us to learn. I saw an educator award plaque near his desk and all I can say is it makes total sense. He is a gift to RWJMS and any students who rotate with him will learn a lot and walk away feeling encouraged and motivated to continue to work on themselves and grow throughout the rest of their journey. I think something that is vital to students succeeding is when attendings do not bring an intimidating energy to rounds and give the students room to show what they know, learn what they don't, and give feedback as they go. Dr. Broderick did an outstanding job hitting every one of these marks.					
Very understanding and welcoming attending and excellent teacher. Did not feel scared to ask questions and he provided a lot of teaching.					
Genuinely best clinical educator I've ever worked with. Knew when to empower med students and when to guide discussion. Was so thorough in his reasoning on treatment and testing I learned the most in the limited time I work with him					
Dr. Broderick has extremely helpful bedside and physical exam teaching that really helps you apply the clinical knowledge to the real world interaction					
Outstanding attending. Great bedside manner. Learned a lot on rounds. He helped us work on concise presentations. Very kind.					
Dr. Broderick was extremely great when it came to teaching and provided great feedback that was easy to follow and incorporate as the week and rotation went on. He asked great questions that built off of what we know versus "ready my mind questions," which took away any nervousness or fear of being wrong. Thank you for an excellent learning environment and experience, Dr. Broderick!

'Excellent attending to work with. Teaches efficiently and effectively and provides thoughtful care'

Anonymous:

'Dr. Broderick is an incredibly intelligent and caring attending. He provides excellent coaching and feedback to residents while also taking advantage of teaching opportunities as they arise to help us better ourselves as physicians.'

Anonymous:

'Best attending i have ever worked with- i dont think i have ever learned so much in a week. Really enjoyed how we reviewed imaging everyday'

Anonymous:

'Rounds were evidence based, and Dr. Broderick had teaching points on almost everything we discussed. I learned so much on my rotation adn wish i could spend more time on service with him.'

Anonymous:

'Really enjoyed working with Dr. Broderick. His approach to clinical reasoning and education is very impressive. A true role model.'

Anonymous:

'Pleasure working with Dr. Broderick who provided high level quality care at all times.'

Anonymous:

'Always working efficiently but also providing time for residents and students to learn.'

Anonymous:

'I always learn so much on Dr. Broderick's rotation. I really appreciate how he teaches us to interpret imaging on our own. He serves as a constant reminder of the type of doctor I want to become- really learn a lot from how detail oriented he is and how he is able to communicate with patients. I'm always more motivated to become a better physician when i am on his service and I look forward to working with him again.'
